

**□ A computer bought from us may be more expensive in the short term but over the long run it saves you much more money.**

**Our individual parts and □ custom prebuilds □ carry a much higher warranty length than a prebuilt generic machine which carry a standard 1 year warranty (limited) on the *entire* computer. Keep your receipt, □ RMA the unit with our help and that 2-1/2 year old monitor gets fixed in most cases with a 3 year warranty vs the 1 that you will find on the generic unit. □ If the generic brand's harddrive fails □ 1 day after that year there will be no replacement. □ Our internal components are made from the industry leaders and depending on the component and manufacturer you will receive up to 5 years on individual parts. 1 power supply a year X5 or 1 power supply with a 5 year warranty, its just common cents.**

**And with all that extra warranty coverage you buy to extend the warranty any difference in price is then null and void, the result being in having a well built machine with a lot more power for the same price and totally customizable to your needs, the choice is obvious!**

**As well we build the computer to your needs, if you need some office machines we can build a fleet of identical units or a single workstation, the cases we use offer the addition of extra fans as well to maximize cooling flow for any tight space. Or if your a gamer we can build that ultimate rig, we design the □ computer on what you like visually and power it with whatever you want.**

**When it comes to replacement of parts, we will get it back to you fast compared to a 6 week to a**

**6 month return wait □ on your generic oem □ product.**
